

Henry County Data Center

*Example image. Not actual construction plans

What is a Data Center?

- Data centers power the internet—from streaming and mobile apps to emergency services and businesses.
- Every message, email, video call, and online purchase runs through a data center.
- Brings technology closer to the community, making services faster and more reliable.

How Does This Benefit Henry County?

✓ **\$14.4 million annually** in tax revenue for infrastructure, schools, and county services.

✓ **\$5.6 million annually** for schools, funding better resources, teacher salaries, and technology programs.

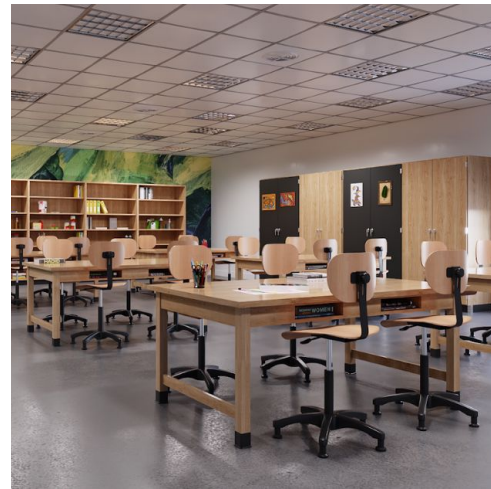

✓ Creates **higher-paying tech jobs** and shifts the workforce from warehouses to skilled industries.

✓ Improves internet speed and access, supporting virtual **medicine, education, and emergency**

What The Data Center WILL Do

- ✓ Invest **\$130.5 million in power** infrastructure upgrades
- ✓ Increase power availability **without raising electric bills**
- ✓ Create **90** permanent jobs averaging **\$80K** salaries
- ✓ Support **education**, businesses, and emergency services

What The Data Center WILL NOT Do

- ✗ Will NOT **drain local water** supplies
- ✗ Will NOT **increase** residents' electric **bills**
- ✗ Will NOT **cause pollution** or industrial **waste**
- ✗ Will NOT **create traffic** congestion or bring tractor-trailers

Community & Environmental Commitments

🌿 **Adding trees** and shrubs to improve aesthetics and **reduce noise**

🌿 **Preserving** the local pond and **historic cemetery**

🌿 Meets all environmental regulations — **no industrial** waste discharge

Actual Construction Renderings

Addressing Common Concerns

? Will it be noisy?

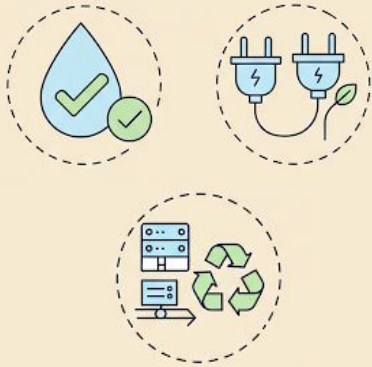

- ◆ **No** — Modern designs include soundproofing, acoustic walls, and vibration dampers.

? Will it use a ton of water?

- ◆ **No** — It uses a closed-loop cooling system, so there's no continuous draw on water supplies.

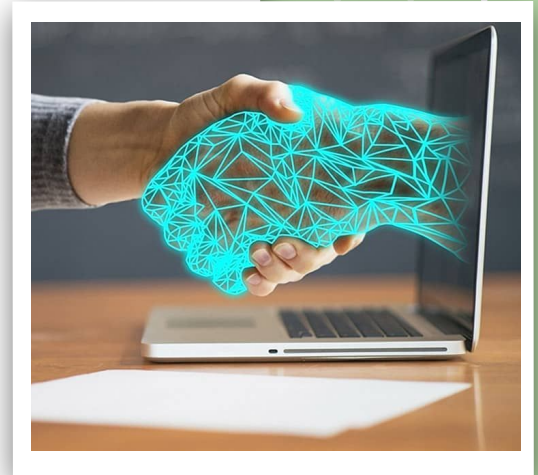

? Will it affect my electric bill?

- ◆ **No** — Instead, it will improve power availability for the county.

A Smart Future for Henry County

- A data center isn't just about technology—it's about **investing in our future.**
- More jobs, **stronger schools**, better services.
- A low-impact addition with **high-impact benefits.**
